

M-Taiwan test and logo issue will initiate from Feb. 2008

BV ADT accredited as a M-Taiwan WiMAX testing lab

Jan. 30, 2008

Mobile Taiwan Applications Promotion Program Office announced, at "M-Taiwan Logo Issue Process and Interoperability Test Standard Symposium" held on Jan. 28th, 2008, that first-phased M-Taiwan test and logo issue will initiate during Feb. and Jun. 2008. BV ADT M-Taiwan WiMAX Testing Lab, located at its Hwa Ya headquarter, will open test bookings from Feb.

M-Taiwan logo is to assure the interoperability among M-Taiwan WiMAX network base stations and mobile terminal equipments based upon IEEE 802.16e-2005, as well as the availability of the island-covered network under M-Taiwan Project.

The test would include RCT (Radio Conformance Test), PCT (Protocol Conformance Test) and IOT (Interoperability Test). RCT and PCT test cases will follow the conclusion of WiMAX Forum Members Conference held on Jan. in Hawaii and Category A & B of the latest CRSL (Certification Requirements Status List). Actual test cases will be released soon. As for IOT, basic network access function and capability for catching enough bandwidth are required.

BV ADT is the only lab acquiring both M-Taiwan and WiMAX Forum service
