

## Bureau Veritas ADT is accredited the RCT test case Validation qualification in WFDVL scope

Bureau Veritas ADT announced that it is granted the RCT test case Validation qualification in the WiMAX Forum Designated Validation Lab (WFDVL) scope.

In order to assist WiMAX Forum Certification Working Group (CWG) in accelerating the process of test case Validation and providing more professional services to customers, Bureau Veritas ADT submitted the application to CWG to extend the Validation qualification for RCT test case. After verification and vote, our application was approved by WiMAX Forum CWG Executive Committee.

Bureau Veritas ADT has been providing Protocol Conformance Test (PCT) test case Validation since October 2008. After expanding, our Validation scope now includes PCT and Radio Conformance Test (RCT).

In the filed of WiMAX Forum Certification Testing, Bureau Veritas ADT possesses the most complete qualifications. Except for being the WiMAX Forum Designated Certification Lab (WFDCL), we are also continuously accredited for WiMAX Forum Designated Validation Laboratory (WFDVL) and WiMAX Certification Body (WCB) in 2008.

Know more about our RCT test case Validation qualification in the WFDVL scope, please see [here](#)
