

## Bureau Veritas ADT is now offering Assisted GPS (A-GPS) testing service

Bureau Veritas ADT is now offering **Assisted GPS (A-GPS)** testing service to the Cellular Handset industry according to the CTIA Test Plan for Mobile Stations Over the Air (OTA) Performance V3.0.

A-GPS development was driven by U.S. FCC Emergency 911 (E911) requirement to quickly provide cell phone location to emergency call dispatchers. A-GPS provides the mobile with knowledge of the GPS satellites to bring the Time to First Fix from minutes down to seconds.

Network operators know that A-GPS testing is important and would like to adopt CTIA's A-GPS OTA testing. Bureau Veritas ADT can offer this testing for GSM, WCDMA, CDMA2000 Cellular Phone and Smart Phone.

In addition to offering CTIA Test Plan for Mobile Stations Over the Air Performance V3.0, Bureau Veritas ADT can also perform WiMAX Forum Radiated Performance Test (RPT) and Wi-Fi Alliance Converged Wireless Group RF (CWG-RF) Performance Evaluation.

For more details about Bureau Veritas ADT's Over the Air Performance testing services, please see below table:

Performance testing service for	Product Categories	Product types
CTIA OTA	GSM, GPRS, EDGE, CDMA2000, 1XEVD0, 1XRTT, WCDMA	Cellular phone, Notebook with 2G or 3G module, E-Book, USB Dongle, etc.
<b>NEW</b> CTIA A-GPS	<b>GSM, WCDMA, CDMA2000</b>	<b>Cellular phone, Smart Phone, etc.</b>
